|---|--|----------------|--|
| <b>Client Name</b>  | ACME Co.                               | <b>Date</b>    |  |
| <b>Project Name</b>   | ACME Custom                            | <b>Version</b> |  |
| <b>Change Request #</b>   | CR0496 – Routing Refresh on MO Release |                |  |
| Description of Change   |  |                |  |
| <p><b>Description of Need:</b><br/>           ACME Co. places MO's in the system with an Open status many months before production begins so that the MO can drive MRP and scheduling.</p> <p>During the time between when the MO is first created and when it is Released to begin production, engineering changes may occur to the Routing.</p> <p>ACME Co. needs to refresh the Working Routing from the current Item Routing when the MO is Released.</p> <p><b>Description of Solution:</b></p> <p>The "Release" process will be modified so that it rebuilds the working routing from the item's current manufacturing routing. The rebuild process will only run when changing the status from Open to Released.</p> |  |                |  |
