Dynamics GP PowerPack - Vendor Pricing
By Nancy Phillippi   1. April 2014 10:19

Stur   f Like ⟨ 1   f Share ⟨ 1   g+1 ⟨ 3   🐦 Tweet ⟨ 0

Our consultants and customers have been a big fan of Willoware products for Dynamics GP for many years. Willoware products just work. They also focus a lot on manufacturing solutions for Dynamics GP which is also an area that Custom Information Services (CIS) has a focus. The GP PowerPack ⬘ has serveral 'tweaks' that focus on different aspects of purchase order cost.

Lock Last Cost

This tweak prevents GP from updating the Originating Invoice Cost field. This allows you to set what the Unit Cost should be, and regardless of the cost on the PO Receipt, the Originating Invoice Cost stays the same. "Lock Last Cost" can also password protect the Originating Invoice Cost field so only certain users have the ability to change it.

Vendor Pricing

This tweak overrides GP when it retrieves the Originating Invoice Cost, and instead provides a cost coming from our Vendor Pricing module. Vendor Pricing provides the ability to setup Vendor Pricing with Quantity Price Breaks, as well as pending price lists which automatically become active on the specified Effective Date. Vendor Pricing integrates tightly with GP Manufacturing, providing the ability in PRR (and MRP Planned Orders) to see the Unit Cost that will be used, manually enter a different cost if needed, and to view the Vendor Price List (if one exists). Of course it also integrates with PO Generator and Purchase Order Entry.

If you would like more information on these or other Willoware products, please let me know.

Nancy Phillippi, Sales and Marketing Manager at Custom Information Services (CIS) for Microsoft Dynamics GP. CIS is a Dynamics GP Silver ERP Partner located in North Texas. CIS also offers Managed IT and Network Services.
